

Workshop BPUG™ SLOVENSKO (BPUG™ - Best Practice User Group)

Invitation to the workshop: Project management for Big Data Management

Ladies and gentlemen.

Please, let us to invite you to participate in “Project management for Big Data management”, half-day workshop intended to help you understand issues of big data that business people are facing on a daily basis. The workshop is being held on **11/06/2014 13:00** at **Faculty of Management of the Comenius University in Bratislava** (room 19).

The main purpose of workshop is to share practical experience in project management of Big Data projects and highlight the specific features typical for successful management of these projects.

The workshop will focus on selected topics:

- Big Data projects approach by the project management***
- Project management specifics relevant for big data projects***
- Big Data project management practical experience and recommendations of best practices***
- Importance of Big Data Management projects with a focus on Big Data Management***
- Big Data Management as a tool of decision making process.***

The speakers will focus on best practises and practical experiences related to the project management , as well as utilisation of Big Data Management for decision making processes.
